OBJECTIVE

To secure a position as a software engineer in a dynamic and stimulating working environment that fosters continuous improvement and provides opportunities for learning new skills.

TECHNICAL SKILLS

- HTML
- Java Script
- Python
- CSS
- Bootstrap
- Django
- React JS
- Tailwind CSS

PROJECTS

Cracking the Caesar Cipher

Implemented the Caesar cipher encryption and decryption algorithm and also designed a powerful tool for cracking Caesar cipher-encrypted messages using frequency analysis.

Automatic Censorable Content Identification in Movies

Harnessed the power of deep learning to automatically identify statutory warning content, such as helmet-wearing or liquor consumption scenes.

Quick Recipe Finder using Django

Developed a web application using Django to help users quickly find recipes based on available ingredients.

Weather App using JavaScript

Created a weather application using JavaScript to provide real-time weather updates for user-specified locations.
